QUE TAN LE
PRIMARY EXAMINER

The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach an apparatus and its method for checking the position of a mechanical part, particularly a free end of an elongate tool, among other features, comprising: a base carrying a mechanical support being moveable with respect to a frame along a longitudinal feed direction; an emitter generating a light beam along a trajectory transverse with respect to the longitudinal feed direction, and a sensor arranged along the trajectory of the light beam for providing signals indicative of reception and interruption of the light beam, the sensor and the emitter being coupled to the support; a transducer device for checking the relative position between the base and the frame; a processing, display and control unit for processing the signals from the sensor and identifying the relative position between the base and the frame; and a coupling mechanism adapted for enabling oscillations of the light beam with respect to the base substantially along a reference surface, and an device and transmission elements adapted for controlling the oscillations of the beam with respect to the base.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
